The College reserves the right to withdraw any of the advertised posts at any time depending on the need.**

**Public Notice**

**Application for the General Release of genetically modified maize**

Corteva Agriscience RSA (Pty) Ltd, P.O. Box 8010, Centurion 0046; hereby informs the public about its intention to submit application for the general release of genetically modified maize event into the environment of South Africa. The application is for TC1507 × MIR162 × NK603 maize.

TC1507 × MIR162 × NK603 maize has been produced by conventional breeding methods between the progeny of three genetically modified maize events; namely, TC1507, MIR162 and NK603 maize.

As a result of the three single maize event modifications, the transformation in the TC1507 × MIR162 × NK603 maize resulted in the introduction of various genes, namely: *cry1F*, *pat*, *vip3Aa20*, *pmi* and *cp4 epsps*.

Expression of the Cry1F and Vip3Aa20 proteins confer protection against certain lepidopteran maize pests.

Expression of the PAT and CP4 EPSPS proteins confer tolerance to glufosinate-ammonium and glyphosate herbicides, respectively (glufosinate-ammonium tolerance was introduced as a selectable marker).

TC1507 × MIR162 × NK603 maize also expresses the PMI protein which was used as a selectable marker during transformation of MIR162 maize.

TC1507 × MIR162 × NK603 maize varieties are intended for cultivation in the maize growing regions in South Africa.

All interested parties should submit comments or objections, in connection with the intended release, in writing, to:

The Registrar: Genetically Modified Organisms Act  
Private Bag X973 Pretoria 0001  
Fax No: 012 319 6298  
E-mail: **GMOAppComments@dalrrd.gov.za**

All comments or objections must be received within 30 days from publication of this notice.
